**Safety , Easy Access, Energy Efficient and Cost-saving**

## Accessibility

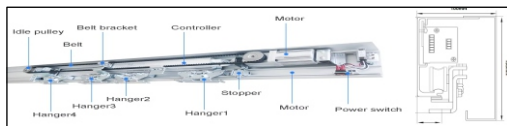

Since automatic doors can be opened without the use of hands, they offer convenience to everyone even with baggage in both hands or carrying a cart. Automatic doors are widely used at high traffic places like commercial buildings, hotels and public facilities to show care and good customer service.

## Hygiene Control

The hands-free operation of automatic doors offer a optimal solution to hospitals and food factories where sanitation is essential. Automatic door with air-tight function can also prevent the entry of dust and dirt by increasing the air pressure of the room, which is suitable for operating rooms and other controlled environments.

## TECHNICAL SPECS

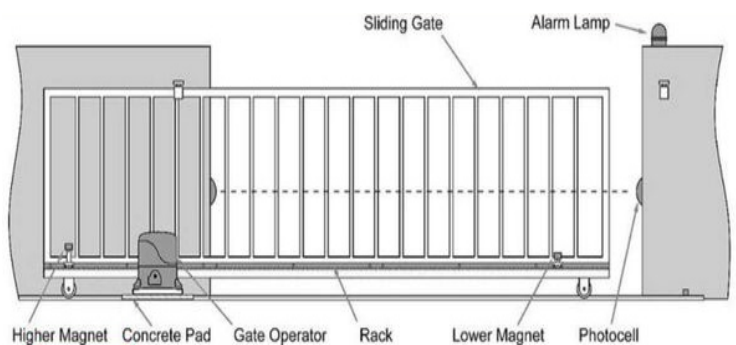

Leaf weight	1 x 180kg single leaf / 2 x 140kg double leaf
Opening speed	max. 0.8 m/s
Closing speed	max. 0.8 m/s
Opening force	10 to 150 N (adjustable)
Closing force	10 to 150 N (adjustable)
Hold open time	1 to 5 sec
<b>Mechanical</b>	
Installation	Surface Applied/Between walls/ Against Posts
Structure	Aluminium
Casing	With cover 170H x 110W Without cover 150H x 110W
Clear opening	700 – 3000 mm single leaf 900 – 3000 mm double leaf
Clearance height	max. 3100 mm
<b>Electrical</b>	
Power supply	AC 220V 5A 50Hz / AC 110V 60Hz
External power supply	24 V DC / 2A
Power Consumption	80W
Sensor power	DC24V
Temperature range	-10 to +50 C
Relative humidity	5 to 95%
<b>Function Programs</b>	
Off	
Automatic	
Permanent Open	
Half Open/Partial Opening	
Locked	

## CLEAN ROOM DOOR

# AUTO SLIDING GATES

Security / Safety

Capacity : 500 to 8000 KG  
Speed : 9 M Per / Min  
Make : European  
Direction : Bi - Direction  
Limit Switch : Mechanical  
Controller : Inbuilt

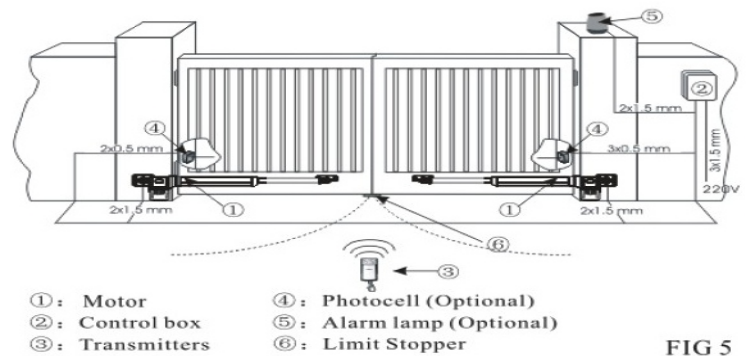

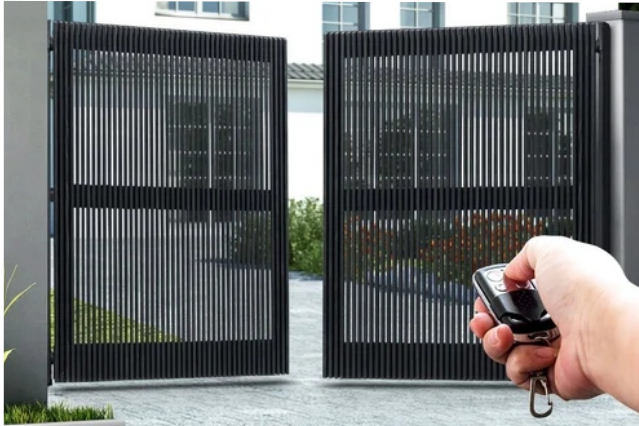

Whether Proof  
Manual Operation on Power Failure

# AUTO SWING GATES

Security / Safety

Capacity : 200 to 700 KG  
Size : 4 M x 4 M  
Speed : Adjustable  
Make : European  
Direction : Single  
Limit Switch : Mechanical  
Controller : Seperate

Whether Proof  
Manual Operation on PowerFailure

# RETRACTABLE GATES

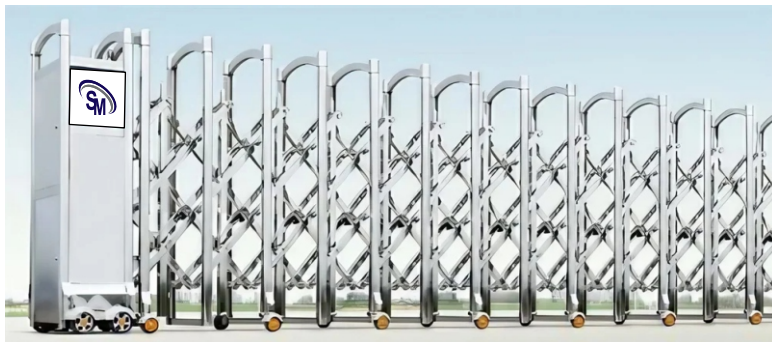

## Wide Opening / Space Saving

Retractable Gate is not only very strong and sturdy,  
It is easy to install and use,  
Without the many difficult installation,  
No Civil Work ,  
Also sturdy and quick to install.

# FIRE RATED DOORS

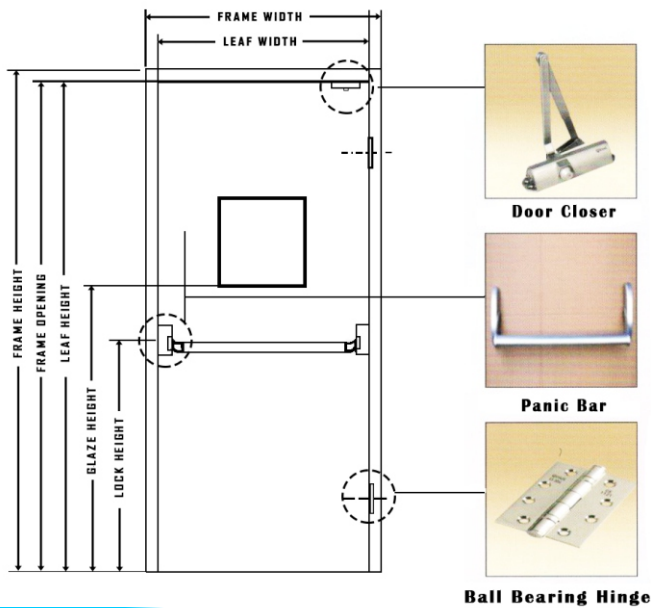

## Fire Rated Doors

Fire Rated Doors are of acute importance in buildings and areas needing to compartmentalize and hold the spread of fire. While the cause of the fire could be arson, short circuit, gas leakage, or sheer negligence, the range of passive fire doors is designed to restrict their spread and save lives. For this, the door must serve as a fire and smoke barrier. Studies have shown that more people have lost lives due to smoke suffocation while firing. These doors are available with Rockwool core as standard infill material and are rated for 60 and 120 minutes fire withstanding ability. All fire doors are factory finished with epoxy primer and polyurethane finish paint / Powder Coated.

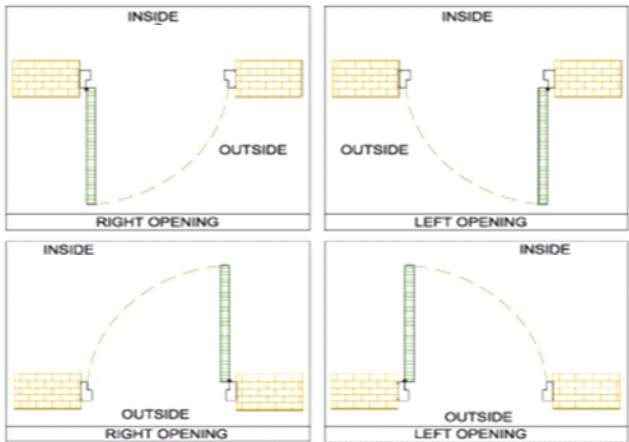

### Specifications

Door Frame, Leaf Liner & Outer sheet Material	GI sheets (Color is Optional)
Liner & Outer Sheet Thickness	1.2mm Thick
Infill Insulation Material	Honycomb & Rockwool
Frame Material	1.6mm Thick
Gasket	Perimeter Single Gasket (smoke & Dustproof)
Firerated Hours of Time	2 Hrs Firerated (CBRI Certified)
Accessories	Hinges, Door Closure, Panicbar/Lock, D-Handle
View Glass	200x300 mm Firerated View Glass
Thickness of Door Leaf	46mm

Power : 1.5 KW  
Safety : Non Return Valve  
Oil : Hydraulic no 60  
Tank Cap : 6 liter  
Refuel : 6 month

# SECTIONAL OVERHEAD DOORS

## Controlled Environments

Industrial sectional overhead doors are important for agricultural businesses. These doors protect the quality of crops after they are harvested. They can be insulated and have door seals—helping to maintain conditions in the building. Sectional overhead doors are best for warehouses and storage buildings where it is necessary to keep the temperature the same.

ELV Switch

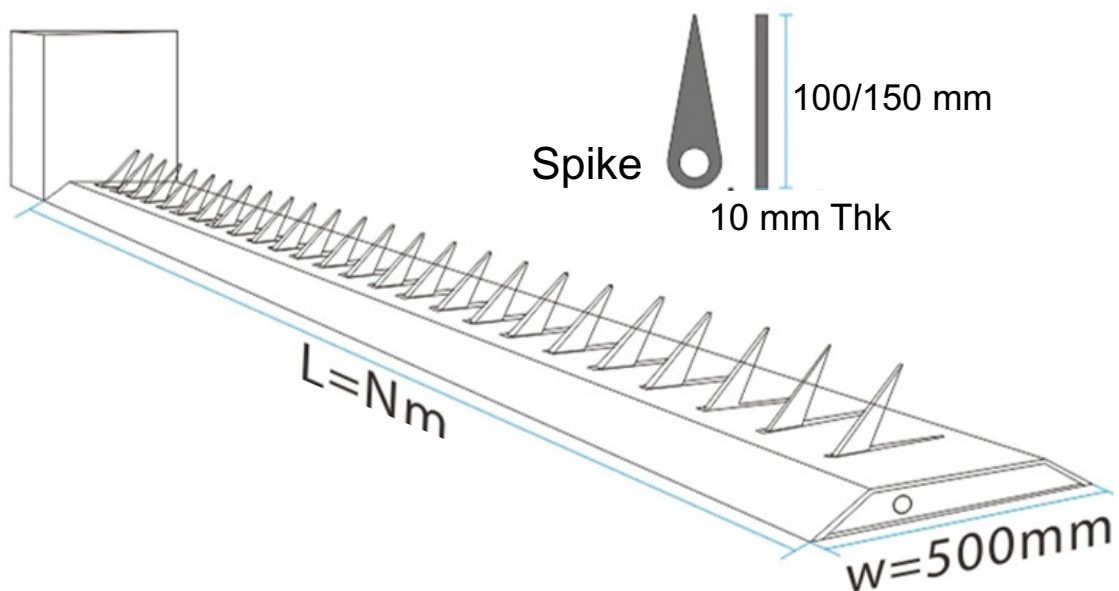

Hydraulic Oil

Flash Lamp

# TYRE KILLER

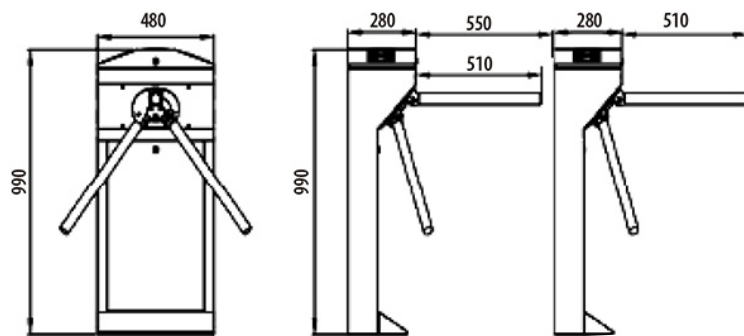

Tyre Killer is an electro hydraulically operated heavy duty spike barrier which rises above the ground level on giving a valid input signal and thus prevents unauthorized intrusions at entry/exit points of high security premises.

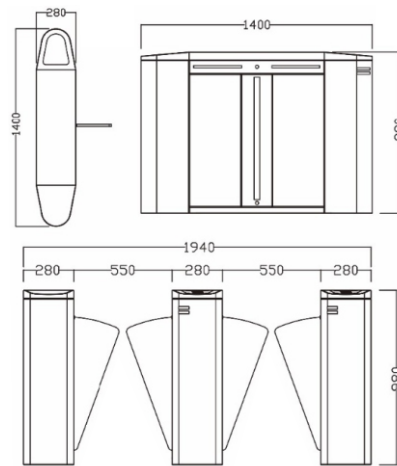

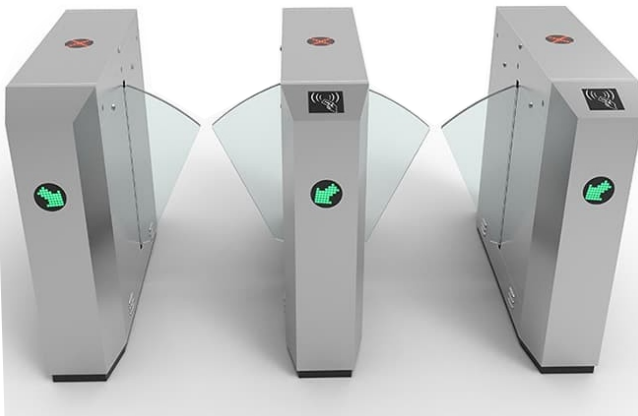

# TRIPOD / FLAP BARRIER

They allow only authorized personnel entrance into facilities and act as a tough-to-breach barrier to would-be unauthorized entrants. By simply employing an entrance turnstile at your facility you can elevate your security and deter unwanted entrants almost entirely autonomously.

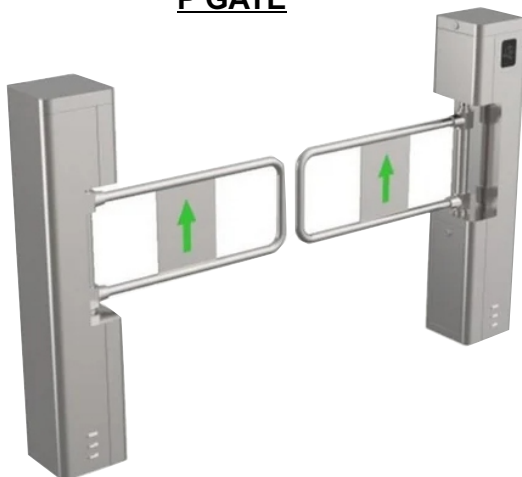

## TRIPOD

## FLAP BARRIER

## P GATE

### Benefits of P-Type Swing Gates

**Enhanced Security:-** Manual P-Type Swing Gates provide a robust security solution that controls and monitors entry and exit points effectively.

**User-Friendly:-** These gates are easy to use, with intuitive operation for both authorized personnel and visitors. The smooth motion enhance user experience.

**Space Efficiency :-** The swinging mechanism requires less space compared to sliding gates, making P-Type Swing Gates ideal for areas with spatial constraints.

**Accessibility :-** P-Type Swing Gates can be configured to comply with accessibility standards, ensuring ease of use for individuals with disabilities.

**Aesthetic Appeal :-** The sleek design of these gates adds a touch of modernity to any setting, enhancing the overall aesthetic appeal of the facility.

# PVC STRIP CURTAINS

PVC STRIP CURTAINS controlling temperature, reducing noise, improving safety, and maintaining a clean and hygienic environment.

## NORMAL TEMPERATURE

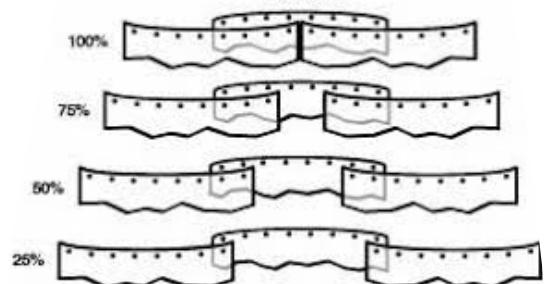

1. Economical
2. Low maintenance
3. Control temperatures
4. Isolate noise
5. Reduce the movement of contaminants
6. Reduce pests
7. Easy for employees to pass through
8. Transparent
9. Increase employee comfort
10. No need to remember to close them

## FREEZER GRADE

8 INCH STRIP

# HYGIENE SYSTEM

## AIR CURTAIN

Keeps the atmosphere clean from pest and insects, dust, airborne, pollution, smells, odours and stops draughts and cold or hot air entrance.

**STAINLESS STEEL**

**ALUMINIUM**

## HAND DRYERS

Hand Dryers are not only efficient in drying hands quickly but also are notably more quiet than other hand drying alternatives and contribute to environmental sustainability by reducing paper waste and offering better energy efficiency compared to paper towels.

**ABS MODEL**

**STAINLESS STEEL**

**JET HAND DRYERS**

## INSECT KILLER

INSECT KILLER work specific wavelength of light that is attractive to insects. When the insects fly towards the light, they are electrocuted or trapped on adhesive surfaces. These machines are a popular way to control insect populations, as they are relatively inexpensive and easy to use.
